

Magnetic Document Holder Windows

Magnetic document holders are great for keeping papers in place and preventing unwanted tampering. The magnetic document holders have a see through front protecting the paper from dust and keeping all your display in line giving a professional look to your whiteboard.

There are magnetic strips on the back of three of the borders which allows for the paper holder to fix to any magnetic surface and also means that putting in the sheets and taking them out is a very simple operation. There are six colourful borders to choose from which can tie in with your company branding or office decor.

The size of the border is 10mm meaning the overall size is slightly bigger than the standard paper size to allow the full paper to display through the see through front.

Magnetic document holder windows are available in A4 A3 A5 and A6.

Border colours are available in **Blue, Black, Grey, Red, Yellow** and **Green***.

The document holder windows can be displayed **landscape** or **portrait** to suit your display.
